a/ A family is a group of two people or more (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered as members of one family.

b/ A household includes the related family members and all the unrelated people who occupy a housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit is also counted as a household.

Note: Data for 1994 onward are not comparable to prior historical data because of the Current Population Survey redesign.
